

# SHRINK-OUT SMOKE VENTS

STANDARD SHRINK-OUT

## STANDARD SHRINK-OUT

Shrink-Out Smoke Vents are gravity operated acrylic double domes designed to automatically shrink and fall out in the event of a fire. These units are generally used when buildings have no sprinkler system or they employ a standard sprinkler system designed to operate at 165 degrees.

## ESFR RATED SHRINK-OUT

These units are equipped with a fusible link activated release mechanism which will ensure the unit does not activate prior to reaching the fusible link temperature. These units are designed for use with an ESFR (Early Suppression, Fast Response) sprinkler system.

## SPECIFICATIONS

### CONSTRUCTION

- Acrylic double dome
- Aluminum frame
- UL Tested and Approved
- All hardware for installation included

### FINISH

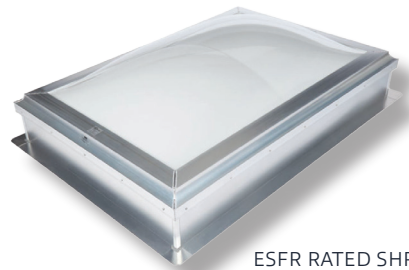

- Mill (Standard)
- 2605 FEVE Powder Coat, 2605 PVDF, 2604 Powder Coat, and Anodized
